Embarkation ladder, Manila Rope, MED approved, Drewil

Item no.: 1185996

Embarkation ladder made of weather-resistant hardwood.

- Steps have a non-skid/anti-skid surface.
- The side ropes consist of two uncovered 18 mm ropes with no joints and with a breaking strength at 24kn per side.
- Through the use of polyamid wedges, one can dispense with the reinforced wooden steps.
- The ladder is produced by weatherproof material, which secure the ladder a longer endurance.
- Steps are secured with sea water resistant aluminum clamping system.
- Aluminium clamps guarantee a firm hold of the steps.

Embarkation ladder with steps made of hard European beech wood with ergonomic shapes, rounded edges and special designed anti-slip surface.

The shape of the high-viz distance pieces, made of durable plastic chocks, increases the strength of ladder making it more secure to use.

For every meter the distance pieces are high-viz are orange. Side ropes are of high quality 20 mm manila ropes with a strength exceeding 24 Kn.
